Profile

Former Brazilian Air Force member with experience in air traffic control and leadership. Transitioned into software development, specializing in HTML, CSS, JavaScript, React, and Python. Strong problem-solving skills, teamwork-oriented, and eager to learn new technologies.

Employment history

Developer (2022 – Present)

- Developed personal projects to strengthen skills in JavaScript, React, HTML, and CSS, including calculators, timers, and responsive landing pages.
- Built React applications for note-taking and movie reviews, focusing on component-based architecture and state management.
- Implemented user authentication, profile editing, and data storage using Node.js, Express, and SQLite.
- Recently resumed active development, focusing on modern frontend practices and building a portfolio of real-world projects.

Real Estate Agent - More Options Realty, LLC - Ohio (Nov 2024 – Present)

- Strong understanding of land acquisition, zoning regulations, and property valuation, capable of managing land transactions for project development.
- Solid foundation in Land and Property Laws and negotiation, eager to apply fresh skills in securing land deals for project development and driving successful outcomes for clients.

Ramp Supervisor - Worldwide Flight Services | Pittsburgh Intl. Airport (July 2024 – Feb 2025)

- Oversee ramp operations ensuring compliance with airline policies and standard operating procedures, prioritizing customer safety and satisfaction.
- Supervise ramp staff, ensuring efficient and safe ground operations for an enjoyable passenger experience.

Air Traffic Controller/Brazilian Air Force – Porto Alegre Intl. Airport (2020 – 2024)

- Ensured safe and efficient air traffic communication.
- Developed a database for 3D tower simulation exercises.
- Led and trained recruits, managed teams, and coordinated campus transportation.
- Gained experience in radar operations and radio communication.
